**Reduce the RISK of FIRE in YOUR FACILITY**  
*Schedule Your Fire Door Inspections Today!*

 **Call Us**  
**800-492-2392**

**Fire door inspections** are the first step toward fire door compliance. Fire doors *must be tested and inspected* on an **ANNUAL BASIS**. A ruling of non-compliance could have tragic consequences.

Facility Managers must implement *preventative maintenance* and *fire door inspection programs* to prevent fire and smoke spread. Neglecting maintenance or damaging the door, closure, guides, tracks, or obstructing the fire door can cause it to fail during an emergency, putting people at risk. Addressing these issues is crucial for everyone's safety.

Door Services strictly follows the NFPA 80 guidelines for fire doors. Our team of fire door inspectors receive training on a semi-annual basis to stay up-to-date of code changes and to be able to continue providing quality fire door inspections.

#### **FIRE DOOR REPAIRS**

All fire door repairs are performed to code standards. Repairing fire doors requires technical skills and precision, we are highly qualified and trained to meet compliance standards.

#### **FIRE DOOR LABELING**

Labels on fire doors, frames, or other components of a fire door assembly, are the identifying mark that the fire door or component has been tested and has passed the criteria required by test standards. Fire door labels should not be removed or made illegible while the fire door is in service.

According to a report by the NFPA,  
*"Fire Loss in the US in 2021"*,  
there were

**125,500 Non-Residential Fires**  
in 2021 and **\$3.6M in property loss.**

#### **THINK ABOUT THAT!**

**125,500 FIRES.**  
That's a 4% increase from 2020  
and deaths rose 30%.

Regardless of whether your facility is a healthcare, industrial, education, or commercial building, it is crucial to make sure your **FIRE DOORS** and **FIRE PROTECTION** systems are up-to-date and properly working.
